this book is an introduction to the emerging field of nanomedicine and its applications to health care it describes the many multidisciplinary challenges facing nanomedicine and discusses the required collaboration between chemists physicists engineers and clinicians the book introduces the reader to nanomedicine s vast potential to improve and extend human life through the application of nanomaterials in diagnosis and treatment of disease

2000 2005 state textbook adoption rowan salisbury

reflecting the expertise and perspective of five leading mammalogists the fourth edition of mammalogy adaptation diversity ecology significantly updates taxonomy includes a new chapter on mammalian molecular phylogenetics and highlights several recently described species there are close to 5 500 species in the class mammalia including the blue whaleâ the largest animal that has ever livedâ and the pygmy shrew which weighs little more than a penny the functional diversity of mammals has allowed them to play critical roles in every ecosystem whether marine freshwater alpine tundra forest or desert many mammal species are critically endangered and present complex conservation and management challenges this

book touches on those challenges which are often precipitated by overharvesting and habitat loss as well as emerging threats such as the impact of wind turbines and white nose syndrome on bats and chronic wasting disease on deer among the updates and additions to the fourth edition of mammalogy are numerous new photos figures and cladograms over 4 200 references as well as a completely new chapter on mammalian phylogeny and genomics current taxonomy including major changes to orders suborders and superfamilies of bats and rodents an explanation of the recent inclusion of whales with terrestrial even toed ungulates updates on mammalian structural functional adaptations and fossil history recent advances in our understanding of phylogeny biogeography social behavior and ecology a discussion of two new orders and thirteen newly recognized extant families reflections on the implications of climate change for mammals thorough examinations of several recently described species including durrell's vonsira salanoia durrelli and the laotian rock rat laonastes aenigmamus an explanation of mammalian biomechanics such as that seen in lunge feeding of baleen whales breakout boxes on unique aspects of mammals including the syntax of bat songs singing mice and why there are no green mammals unless we count algae covered sloths maintaining the accessible readable style for which feldhamer and his coauthors are well known this new edition of mammalogy is the authoritative textbook on this amazingly diverse class of vertebrates
