middle east politics have been proverbial for their changeability the 1970s ushered in petro politics for instance but opec s international status declined markedly in the following decade similarly the arab world s ostracism of egypt in the 1970s following its separate peace with israel was turned around in the 1980s the late 1980s also brought plo acceptance of the state of israel interstate relations were not the only arena to experience significant alterations state society relations also underwent dramatic changes such as the acceleration of privatization in erstwhile socialist regimes then the 1990s opened with a political earthquake the gulf crisis the second edition of this highly acclaimed text offers a penetrating analysis of trends in arab foreign policies since the book was originally published in 1984 including an early analysis of the effects of iraq s invasion of kuwait and the subsequent coalition victory over iraq in

addition the authors have included new chapters on jordan at the heart of the arab world and on the sudan the region s link to sub saharan africa their inclusion allows a fuller understanding of the foreign policies of states that occupy crucial geopolitical positions but wield little tangible power moreover in many of its chapters the book raises the crucial question of how the foreign policies of these countries can cope with the prevalence of political change

this book explores the conditions of state formation and survival in the middle east based on historical sociology it provides a model for study of the state in the arab world and a theory to explain its survival examining states as a process the author argues that what emerged in the middle east in the beginning of the twentieth century are social fields where states form and deform and not states as defined by max weber he explores the constitutions of these fields their cultural material and political structures and identifies three stages of state development in which different cases can be located capturing the dilemmas that late forming states face as regimes within them cope with domestic and international pressure the author illustrates several middle east cases and presents a detailed analysis of state developments in saudi arabia and iraq he maintains that more than the domestic characteristics of individual states state survival in the middle east is also a function of the anarchic nature of the international and by extension the regional states system the first to raise the question on the survivability of the territorial states in the middle east while engaging with both international relations and comparative politics theories this book will be of interest to students and scholars of middle east politics comparative politics and international relations
