this volume integrates multimodal theoretical frameworks with those from graphic communication and information design and applies this critical synthesis to the examination of the changes and relationships that occur when multimodal documents are distributed across various means and channels of consumption drawing on examples from popular newspapers and store catalogs the book s specific focus is on documents as sets here defined as the collective of all the assorted forms of a document published across multiple mediums and modes this approach affords a multi layered analysis of multimodal documents more broadly in addition to engaging in questions about the very definition of a document and the terminology we use in relation to documents including genres mediums and modes as both a critical examination of the theoretical frameworks employed in literature on documents and a way forward for new approaches to analyzing multimodal texts this volume is key reading for students and scholars in multimodality graphic communication design media studies and information science

this book explores all aspects of the sharing economy pursuing a multidisciplinary approach encompassing service design spatial design sociology economics law and transport and operations research the book develops a unified vision of sharing services and pinpoints the most important new challenges the first more theoretical part covers general topics from the

perspectives of experts in the respective disciplines among the subjects addressed are the role of the user in co design and co production impacts of sharing services on cities communities and private spaces individual rewarding and social outcomes regulatory issues and the scope for improving the efficiency of design management and analysis of sharing services in turn the second part of the book presents a selection of case studies of specific sharing services in which many of the concepts described in the first part are put into practice readers will gain a deeper understanding of the dynamics of sharing services and of the hidden problems that may arise key factors responsible for the success or failure of sharing services are identified by analyzing some of the best and worst practices given its breadth of coverage the book offers a valuable guide for researchers and for all stakeholders in the sharing economy including startup founders and local administrators
