protection of consumer's interest is one of the key objectives described in the preamble of the Indian Electricity Act 2003. The act provides protection to consumers with reference to standards of performance. If a licensee fails to meet the specified standards, then disregarding any penalty that may be imposed or prosecution pronounced, the regulatory commissions will have powers to impose appropriate compensation to be paid to the affected person within the time limit. There is little published work on law relating to electricity available. This book will therefore be of interest to lawyers, economists, and policy makers in general and not just in the procurement field. More specifically, it is hoped that the results will bring new changes in the electricity sector for settling disputes and in protection of consumer rights. The findings will also have implications for the design of enforcement systems under other international arrangements. It is hoped that this book will be useful to students, researchers, academicians, and members of the legal fraternity. This book is an attempt to explore various electricity acts, regulations, and consumer protection.

contributed articles emerging out of various seminar platforms on Indian government policies on competition and laws regarding it.

This handbook is written in response to needs expressed by developing countries for assistance in drafting legislative provisions for promotion of energy efficiency and renewable energy and particularly their environmental dimensions. It addresses the key environmental and implementation issues and presents legislative options for both developed and developing countries for dealing with them, including sample excerpts from legislation. Publisher's description:

Courts, regulators, and the scrutiny of economic evidence presents the first systematic examination of economic regulation and the crucial role of economic evidence in regulatory authorities and courts. This book brings together strands of scholarship from law, economics, and political science to explore two key themes: the influence of economic evidence on the discretionary assessments of economic regulators and the limits of judicial review of economic evidence, supplemented with comparative examination of both UK and US systems in light of the challenges posed by economic evidence. Mantzari argues the appropriate scope of judicial review in the era of regulatory economics and what the optimal institutional response to the pervasiveness of economic evidence in regulation should be, building on comparative institutional analysis. This book rejects single-factor explanations such as the individual knowledge of judges in favour of a richer set of macro and micro-level factors that shape the relationships between courts and regulators. Mantzari argues that the recipe for adjudicating economic evidence requires a balance in which a degree of epistemic diversity is introduced in courts and deference is accorded to regulatory agencies on grounds of institutional competency. The book combines

theoretical doctrinal comparative and empirical analysis and it is written to be accessible to lawyers economists judges regulators policymakers and political scientists

the electricity act 2003 was a landmark act which promised to remove the maladies which afflict the indian power sector and that too at a time when the sector was ridden with problems with concepts such as open access multiple distribution licensees wheeling of electricity etc the said act intended to encourage competition which in turn was meant bring a paradigm shift in the sector the paper undertakes a systematic literature review to find the status of review of the promising act more than a decade has passed since its enactment and amendments are due with the legislative body of india but none of the literature reviewed gives a comprehensive view encompassing all the objectives of the act moreover these documents study either the probable impact or the impact on a particular segment only it has important implications for the power sector which highlights a significant gap in literature and provides a basis on which future research can be built upon
